

DECISIONS

COMMISSION IMPLEMENTING DECISION (EU) 2022/1390

of 9 August 2022

amending Decision 2011/163/EU on the approval of plans submitted by third countries in accordance with Article 29 of Council Directive 96/23/EC

(notified under document C(2022) 5636)

(Text with EEA relevance)

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Council Directive 96/23/EC of 29 April 1996 on measures to monitor certain substances and residues thereof in live animals and animal products and repealing Directives 85/358/EEC and 86/469/EEC and Decisions 89/187/EEC and 91/664/EEC ⁽¹⁾, and in particular Article 29(1), fourth subparagraph, and Article 29(2) thereof,

Whereas:

- (1) Directive 96/23/EC requires that third countries from which Member States are authorised to import animals and animal products covered by that Directive submit residue monitoring plans providing the required guarantees ('the plans'). The plans are to cover at least the groups of residues and substances listed in Annex I to Directive 96/23/EC.
- (2) Commission Decision 2011/163/EU ⁽²⁾ approves the plans submitted by certain third countries concerning animals and animal products, which are listed in the Annex to that Decision.
- (3) Certain third countries are using only raw material either from Member States or from other third countries approved for imports of such raw material to the Union, in accordance with Article 2 of Decision 2011/163/EU for the production of products intended for export to the Union. For the sake of clarity, entries for those countries should be marked with 'Δ', signifying triangular trade for the relevant species or commodity in the table of the Annex to Decision 2011/163/EU.
- (4) Third countries not having presented a plan for bovine, ovine/caprine, porcine, equine or poultry, but request to manufacture composite products destined to be exported to the Union by using processed animal products from those species, should, upon request, be allowed to prepare such composite products provided that they source those processed animal products either from a Member State or an approved third country subject to compliance with

⁽¹⁾ OJ L 125, 23.5.1996, p. 10.

⁽²⁾ Commission Decision 2011/163/EU of 16 March 2011 on the approval of plans submitted by third countries in accordance with Article 29 of Council Directive 96/23/EC (OJ L 70, 17.3.2011, p. 40).

animal health and public health requirements set out in Commission Delegated Regulations (EU) 2019/625 ⁽³⁾ and (EU) 2020/692 ⁽⁴⁾ and Commission Implementing Regulations (EU) 2020/2235 ⁽⁵⁾ and (EU) 2021/404 ⁽⁶⁾. For the sake of clarity, entries for those countries should be marked with an 'O' in the column only for the relevant animal species requested in the table of the Annex to Decision 2011/163/EU.

- (5) Third countries having presented a plan for either aquaculture products, milk or eggs, and request to manufacture composite products, should be allowed to prepare composite products destined to be exported to the Union containing such processed products, by using any of those processed products, provided that processed products for which they have not presented a plan are sourced from Member States or approved third countries. For the sake of clarity, entries for those countries should be marked with an 'O' for the remaining of those categories in the table of the Annex to Decision 2011/163/EU.
- (6) The listing of third countries for molluscs is necessary due to the change in the certification requirements for farmed molluscs. At present, there is no requirement under Directive 96/23/EC, for third countries to submit to the Commission plans for molluscs. The only relevant residue monitoring for the production of farmed molluscs concerning contaminants is carried out pursuant to Commission Implementing Regulation (EU) 2019/627 ⁽⁷⁾, and the third countries satisfying those conditions are listed in Annex VIII to Commission Implementing Regulation (EU) 2021/405 ⁽⁸⁾. Since those third countries fulfil the requirements of Articles 56 to 59 of Implementing Regulation (EU) 2019/627 including on the residue monitoring, therefore for the sake of clarity, those countries should be marked with an 'M' in the column 'Aquaculture' in the table of the Annex to Decision 2011/163/EU, signifying 'molluscs'.
- (7) Certain countries requested to export to the Union composite products containing processed products from molluscs originating either from Member States or approved third countries listed in Annex VIII to Implementing Regulation (EU) 2021/405. Countries marked with an 'X' in the table of the Annex to Decision 2011/163/EU for at least one of the following commodities: bovine, ovine/caprine, equine, porcine, poultry, aquaculture, milk, eggs or game, have provided the sufficient guarantees related to their official control system in place. Therefore, all those countries should be marked with a 'P' in the column 'Aquaculture' of that table allowing them to use processed products from molluscs originating either from Member States or approved third countries for the production and export of composite products containing processed products from molluscs.

⁽³⁾ Commission Delegated Regulation (EU) 2019/625 of 4 March 2019 supplementing Regulation (EU) 2017/625 of the European Parliament and of the Council with regard to requirements for the entry into the Union of consignments of certain animals and goods intended for human consumption (OJ L 131, 17.5.2019, p. 18).

⁽⁴⁾ Commission Delegated Regulation (EU) 2020/692 of 30 January 2020 supplementing Regulation (EU) 2016/429 of the European Parliament and of the Council as regards rules for entry into the Union, and the movement and handling after entry of consignments of certain animals, germinal products and products of animal origin (OJ L 174, 3.6.2020, p. 379).

⁽⁵⁾ Commission Implementing Regulation (EU) 2020/2235 of 16 December 2020 laying down rules for the application of Regulations (EU) 2016/429 and (EU) 2017/625 of the European Parliament and of the Council as regards model animal health certificates, model official certificates and model animal health/official certificates, for the entry into the Union and movements within the Union of consignments of certain categories of animals and goods, official certification regarding such certificates and repealing Regulation (EC) No 599/2004, Implementing Regulations (EU) No 636/2014 and (EU) 2019/628, Directive 98/68/EC and Decisions 2000/572/EC, 2003/779/EC and 2007/240/EC (OJ L 442, 30.12.2020, p. 1).

⁽⁶⁾ Commission Implementing Regulation (EU) 2021/404 of 24 March 2021 laying down the lists of third countries, territories or zones thereof from which the entry into the Union of animals, germinal products and products of animal origin is permitted in accordance with Regulation (EU) 2016/429 of the European Parliament and the Council (OJ L 114, 31.3.2021, p. 1).

⁽⁷⁾ Commission Implementing Regulation (EU) 2019/627 of 15 March 2019 laying down uniform practical arrangements for the performance of official controls on products of animal origin intended for human consumption in accordance with Regulation (EU) 2017/625 of the European Parliament and of the Council and amending Commission Regulation (EC) No 2074/2005 as regards official controls (OJ L 131, 17.5.2019, p. 51).

⁽⁸⁾ Commission Implementing Regulation (EU) 2021/405 of 24 March 2021 laying down the lists of third countries or regions thereof authorised for the entry into the Union of certain animals and goods intended for human consumption in accordance with Regulation (EU) 2017/625 of the European Parliament and of the Council (OJ L 114, 31.3.2021, p. 118).

- (8) In the table of the Annex to Decision 2011/163/EU, the category 'Aquaculture products' is divided into four sub-categories, in order to align these sub-categories with the ones covered by model certificates for entry into the Union set out in Commission Implementing Regulation (EU) 2020/2235 ⁽⁹⁾, and the corresponding lists of third countries authorised for the entry into the Union of such products laid down in Implementing Regulation (EU) 2021/405.
- (9) Recent experience has shown that such sub-categorisation of aquaculture products does not provide the necessary clarity for control staff at the Union border control posts. Therefore, it is appropriate to revert to a single column for 'Aquaculture' in the table of the Annex to Decision 2011/163/EU.
- (10) Australia, Bangladesh, Brazil, Canada, China, Colombia, Costa Rica, Ecuador, Honduras, Indonesia, India, South Korea, Sri Lanka, Madagascar, Malaysia, Myanmar/Burma, Mexico, Panama, Peru, Philippines, Saudi Arabia, Thailand, Taiwan, the United States and Vietnam have submitted plans, which cover aquaculture products. The plans provide sufficient guarantees and should therefore be approved.
- (11) Albania, Armenia, Argentina, Bosnia Herzegovina, Belarus, Switzerland, Chile, Falkland Islands, Faroe Islands, the United Kingdom, Isle of Man, Israel, Japan, Kenya, Morocco, Moldova, Montenegro, North Macedonia, Mauritius, New Zealand, Serbia, Singapore, Tunisia, Turkey, Ukraine, and Uruguay have submitted plans, which only cover finfish. The plans provide sufficient guarantees and should therefore be approved, with a scope limited to finfish.
- (12) Brunei, Belize, Cuba, Guatemala, Mozambique, New Caledonia, Nigeria, Nicaragua, Tanzania and Venezuela have submitted plans, which only cover crustaceans. The plans provide sufficient guarantees and should therefore be approved, with a scope limited to crustaceans.
- (13) Iran has submitted a plan, which only covers roes and caviar and crustaceans. This plan provides sufficient guarantees and should therefore be approved, with a scope limited to roes and caviar and crustaceans.
- (14) Andorra, the United Arab Emirates, Colombia, the United Kingdom, Hong Kong, Morocco, Mexico, Malaysia, Singapore, San Marino, Thailand, and Kosovo have not presented plans for certain species of animals and animal products pursuant to the requirements of Article 7 of Directive 96/23/EC. However, those countries have provided sufficient guarantees in accordance with Article 2 of Decision 2011/163/EU, to export such products to the Union, originally sourced from a Member State or an approved third country. Therefore, those third countries should be approved for triangular trade.
- (15) Australia, Canada, Switzerland, Chile, the United Kingdom, Guernsey, Greenland, Isle of Man, Jamaica, Jersey, Japan, South Korea, Morocco, New Zealand, Peru, Thailand, Tunisia, Turkey, Ukraine, the United States, Uruguay and Vietnam are listed in Annex VIII to Implementing Regulation (EU) 2021/405 as authorised third countries for the entry into the Union of live, chilled, frozen or processed bivalve molluscs, echinoderms, tunicates and marine gastropods. Therefore, those third countries should be marked with an 'M' in the column 'Aquaculture' in the table of the Annex to Decision 2011/163/EU.
- (16) Andorra, the United Arab Emirates, Albania, Armenia, Argentina, Bosnia and Herzegovina, Bangladesh, Brunei, Brazil, Botswana, Belarus, Belize, China, Colombia, Costa Rica, Cuba, Ecuador, Falkland Islands, Faroes Islands, Guatemala, Hong Kong, Honduras, Indonesia, Israel, India, Iran, Kenya, Sri Lanka, Moldova, Montenegro, Madagascar, North Macedonia, Myanmar, Mauritius, Mexico, Malaysia, Mozambique, Namibia, New Caledonia, Nigeria, Nicaragua, Panama, Philippines, Saint Pierre and Miquelon, Paraguay, Serbia, Russia, Saudi Arabia,

⁽⁹⁾ Commission Implementing Regulation (EU) 2020/2235 of 16 December 2020 laying down rules for the application of Regulations (EU) 2016/429 and (EU) 2017/625 of the European Parliament and of the Council as regards model animal health certificates, model official certificates and model animal health/official certificates, for the entry into the Union and movements within the Union of consignments of certain categories of animals and goods, official certification regarding such certificates and repealing Regulation (EC) No 599/2004, Implementing Regulations (EU) No 636/2014 and (EU) 2019/628, Directive 98/68/EC and Decisions 2000/572/EC, 2003/779/EC and 2007/240/EC (OJ L 442, 30.12.2020, p. 1).

Singapore, San Marino, Eswatini, Taiwan, Tanzania, Venezuela and South Africa have requested to export composite products containing processed products derived from molluscs. Those countries have provided guarantees in accordance with Article 2 of Decision 2011/163/EU to use only molluscs originating, either from Member States or from approved third countries listed in Annex VIII to Implementing Regulation (EU) 2021/405 and should be marked with a 'P' in the column 'Aquaculture' of that table.

- (17) The United Arab Emirates have submitted to the Commission a plan for honey covering only one region. That plan provides sufficient guarantees and should therefore be approved. An entry for the United Arab Emirates for honey should be included in the table of the Annex to Decision 2011/163/EU, limited to that region.
- (18) Chile and Greenland are listed in the table of the Annex to Decision 2011/163/EU for their export towards the Union of ovine and caprine meat. However, Chile and Greenland have informed the Commission that they are no longer interested to export caprine meat to the Union. The entries for Chile and Greenland for ovine and caprine meat in that table should therefore be restricted to ovine meat.
- (19) Guernsey is listed in the table of the Annex to Decision 2011/163/EU for its export towards the Union of bovine meat and milk. However, Guernsey informed the Commission that it is no longer interested to export bovine meat to the Union. The entry for Guernsey for bovine meat and milk in that table should be restricted to milk.
- (20) Singapore and Thailand have not submitted to the Commission a plan for eggs. However, Singapore and Thailand have provided guarantees to use only eggs originating, either from Member States or third countries authorised for entry into the Union of such products and they have informed the Commission that such eggs to be exported to the Union will not be limited to composite products containing processed egg products. Consequently, the entries for Singapore and Thailand for eggs should be marked with 'Δ' in the table of Annex to Decision 2011/163/EU.
- (21) The United Arab Emirates and Sri Lanka have not provided plans for milk from bovine, ovine and caprine species pursuant to the requirements of Article 7 of Directive 96/23/EC. However, they have provided guarantees to use only milk products originating, either from Member States or approved third countries for the production of composite products to be exported to the Union. Consequently, the entries for the United Arab Emirates and Sri Lanka for milk products should be marked with an 'O' in the table of the Annex to Decision 2011/163/EU including eggs products, as those third countries have at least an 'X' for either milk of camel (United Arab Emirates), or aquaculture products (Sri Lanka) in that table.
- (22) Malaysia has not provided a plan for milk and eggs pursuant to the requirements of Article 7 of Directive 96/23/EC. However, Malaysia has provided guarantees to use only milk and eggs originating either from Member States or approved third countries for the production of composite products to be exported to the Union. Consequently, the entry for Malaysia for milk and eggs should be marked with an 'O' in the table of the Annex to Decision 2011/163/EU.
- (23) Sierra Leone is currently listed in the table of the Annex to Decision 2011/163/EU for honey and Uganda for aquaculture products. As those third countries have not submitted to the Commission plans for the respective products, those entries should be deleted from that table.
- (24) Decision 2011/163/EU should therefore be amended accordingly.
- (25) The measures provided for in this Decision are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS DECISION:

Article 1

Decision 2011/163/EU is amended as follows:

(1) the following articles are inserted after Article 2:

Article 2a

Third countries not having presented a residue-monitoring plan for animals and animal products but, based on third country's request, intending to export to the Union animal products prepared by using raw material of animal origin obtained from a Member State or third country that has provided a residue monitoring plan in accordance with Article 29 of Directive 96/23/EC are marked with "Δ" in the table in the Annex to this Decision for triangular trade.

Article 2b

Third countries not having presented a residue-monitoring plan for bovine, ovine/caprine, porcine, equine or poultry animals but, based on third country's request, intending to export composite products to the Union, using processed animal products from those species, obtained from a Member State or an approved third country are marked with an "O" in the column only for the relevant animal species in the table in the Annex.

Article 2c

Based on third country's request, third countries marked with an "X" in either of the categories aquaculture products, milk or eggs in the table of the Annex are marked with an "O" in that table for the remaining of those categories.

Article 2d

All third countries listed for live, chilled, frozen or processed bivalve molluscs, echinoderms, tunicates and marine gastropods in Annex VIII to Implementing Regulation (EU) 2021/405 are marked with an "M" in the table in the Annex to this Decision for molluscs.

Article 2e

All third countries producing composite products from processed products derived from molluscs, insofar as the processed bivalve molluscs either originate from Member States or third countries listed in Annex VIII to Implementing Regulation (EU) 2021/405 are marked with a "P" in the column "Aquaculture" in the table in the Annex to this Decision for processed products derived from molluscs.;

(2) the Annex is replaced by the text in the Annex to this Decision.

Article 2

This Decision is addressed to the Member States.

Done at Brussels, 9 August 2022.

For the Commission
Stella KYRIAKIDES
Member of the Commission

⁽¹⁾ List of countries and territories (not limited to countries recognised by the Union).

⁽²⁾ Camel milk only.

⁽³⁾ Only the region of Ras al Khaimah.

⁽⁴⁾ Does not include the geographic areas that came under the administration of the State of Israel after 5 June 1967, namely the Golan Heights, the Gaza Strip, East Jerusalem and the rest of the West Bank.

⁽⁵⁾ Ovine species only.

⁽⁶⁾ In accordance with the Agreement on the withdrawal of the United Kingdom of Great Britain and Northern Ireland from the European Union and the European Atomic Energy Community, and in particular Article 5(4) of the Protocol on Ireland/Northern Ireland in conjunction with Annex 2 to that Protocol, for the purposes of Annexes II to XXII, references to the United Kingdom do not include Northern Ireland.

⁽⁷⁾ Does not include Kosovo (this designation is without prejudice to positions on status, and is in line with UNSCR 1244/1999 and the ICJ Opinion on the Kosovo declaration of independence).

⁽⁸⁾ Export to the Union of live equidae intended for slaughter (food producing animals only).

⁽⁹⁾ Reindeer only.

⁽¹⁰⁾ Only for commodities of fresh meat originating from New Zealand, destined to the Union and being unloaded, reloaded and transited with or without storage through Singapore.

⁽¹¹⁾ Caprine species only.

⁽¹²⁾ This designation is without prejudice to positions on status and is in line with UNSCR 1244/1999 and the ICJ Opinion on the Kosovo declaration of independence.

⁽¹³⁾ Ratites only.

⁽¹⁴⁾ Finfish only.

⁽¹⁵⁾ Crustaceans only.

⁽¹⁶⁾ Roes and caviar only.

⁽¹⁷⁾ Aquaculture covers finfish, including eels, and products of finfish (such as roes and caviar) and crustaceans.'
